

Vermont Statewide Parcel Mapping Project

Creating up-to-date and standardized digital parcel boundary data through partnerships between municipalities, state agencies, and mapping companies.

Eligibility	Benefits	Funding	Vendor-based
All municipalities are eligible to participate. This project will update parcels statewide.	Municipalities are likely to benefit financially, as funds cover updates and standardization.	Project funds will only cover data. For paper maps, towns should contract with a company.	This is not grant funding. VTrans has 10 vendors & will assign them to towns, with town input considered.

How to participate

NOW

1. Email Leslie to indicate your interest
2. Provide updated information about your current parcel data status
 - Date
 - Format
 - Mapping company (if any)

SUMMER 2018

1. Provide additional information to mapping contractors as they prepare to bid for towns
2. Contractor is assigned to your town by VTrans
3. Funded project will cover creation or updating of digital parcel data to ensure 99% match between the Grand List and parcel data
4. Decide whether additional services/products are desired, which would be obtained outside of the contract from the mapping company at the expense of your town

WINTER 2019

1. Data is finalized and delivered
2. Reap the benefits!
